

CREATE™ Office Platform

By Three H

Apps have become the Swiss Army knives of our digital lives, allowing us to tailor and use our smartphones in different ways as our situation changes, all with a minimum of fuss (assuming a good cell signal, of course). Three H aims to deliver that same feeling of versatility and customization to workplace design with its Create Office Platform, a single-source system capable of delivering a series of distinctive configurations (or “apps”) for the various spaces that make up the modern office. Powered by the company’s innovative RED plug-in for SketchUp, the Create platform makes designing and pricing to-the-inch designs faster than ever. Here’s how it all breaks down:

4

Distinctive configurations allow designers to use Create for executive (“Club”), mid-management (“Studio”), open plan (“Forum”), and benching (“Park”) applications.

5

Worksurface shapes are available, all in by-the-inch lengths.

6

Inches, the typical sizing increment allowed with other desking systems.

\$0

The cost to use Three H’s Rapid Easy Design (RED) plug-in for SketchUp.

33

Woodgrain and solid color laminate choices in stock.

1,000s

The number of Create products available for specification through RED when all available attributes and options are considered.

45

In-stock panel and cushion fabrics from Maharam, Guilford of Maine, and Momentum.

500 miles

The radius from Three H’s Ontario manufacturing facility in which all of the system’s major components are sourced, including laminates, steel, aluminum, glass, and fabrics.

100

Percent recycled wood content, CARB-compliant laminate is used to build Create; the system also makes use of recycled extruded aluminum for its pulls, legs, and slatwalls.
